ENERGY CONSERVATION THROUGH WOMEN

Students participating in the session on energy conservation through women on 01/01/2017

A session on Energy conservation through women at house hold level was conducted by Sri. Toms Antony, Trainer, Energy Management Centre, Thiruvananthapuram. It was based on the survey of NSS Volunteers at Thuravoor Grama Panchayath. Raising awareness on energy conservation is highly significant in the present world. Energy conservation reduces the need for energy services and can result in increased environmental quality, national security, personal financial security and higher savings. It is at the top of the sustainable energy hierarchy. It also lowers energy costs by preventing future resource depletion. Women are the key persons who can do a lot in this regard at household levels.
